Dear Sir/Ma,   8 September 2021

I am a self-taught developer and I am currently searching for any suitable frontend developer role with your organization where I hope to be an invaluable member of your team.

My journey as a developer began at the beginning of 2021, and since that time I have completed several courses that cut across the skill set required to be an effective frontend developer.

I am currently learning React Native and my target is to learn Electron and TypeScript by the end of October while building projects with the tools I have learnt so far in order to continually improve on my knowledge and skills.

The roles I have held in my previous non-tech jobs, have helped me develop the following skills:
o Team Building and Management,
o Project Planning and Management, and
o Data Processing and Analysis with MS Excel;

I strongly believe that a commitment to hard work, team work, and learning are key requirements for success in any venture and I will bring such commitment to your organization.

Please see the page attached for a copy of my resume. Thank you for your kind consideration and I look forward to hearing from you.

Yours sincerely,

MICHAEL ENEMONA ATTAH
